WORKERS COMPENSATION AND OCCUPATIONAL HEALTH SERVICES

The Immediate Care Center is dedicated to helping you maintain healthy and productive employees. Our experienced medical team and four convenient Indianapolis locations offer prompt attention and quality care for your applicants and employees.

In addition to pre-employment physicals and screenings, we offer treatment for a wide range of on-the-job injuries as well as post-accident or injury drug screening.

We provide the documentation you need to make appropriate decisions. We also submit insurance claims directly to your workers compensation carrier or to you based on your preference.

Let our experience go to work for you.

We are also available to your employees and their families for urgent medical needs when their primary care physician is unavailable.

WE OFFER AN EXTENDED 10 PANEL DRUG SCREEN THAT DETECTS THE MOST POPULAR DRUGS OF ABUSE.

Not all drug screens detect the most commonly used street drugs. In fact, most screens are for older and less commonly abused drugs such as morphine or codeine. Today it is more common to detect abuse of newer synthetic opiates not tested by traditional methods. These include hydrocodone derivatives found in Vicodin or Lortab, and dilaudid and oxycodone found in OxyContin or Percodan. We test for these drugs as part of our Extended 10 Panel Drug Screen.

Extended 10 Panel Drug Screen.

OUR DRUG SCREENING PROCESS

Our certified collection technicians follow strict Chain-of-Custody procedures. Physicians review and interpret results following federal guidelines. All drug screens are processed by a NIDA approved lab and are tested for adulterants at no additional charge.

We also offer Medical Review Officer (MRO) services to interpret urine drug screen results required for employers doing DOT mandated drug and alcohol testing. The MRO is a licensed physician knowledgeable in the medical use of prescription drugs and the pharmacology and toxicology of illicit drugs.

You *always* get the results right away.

EXPERIENCE YOU CAN TRUST

The Immediate Care Center has provided occupational healthcare for Indianapolis employers since 1981. Our experience and dedication to *service excellence* is evident in the care we provide for both work-related and personal healthcare needs.

CONVENIENT, COST-EFFECTIVE CARE

Our extended operating hours offer convenience and reduce long emergency department waits. At the Immediate Care Center your applicants and employees are treated in a timely, caring, and cost-effective manner.

As your business partner, we provide you with a direct contact so your account is handled the way you prefer. Our occupational medicine/workers compensation specialists are available to ensure your expectations are being met.
